SUMMARY

Results-driven **Software Engineer** with 4+ years of experience in **Frontend and Full Stack development**. Specialized in building **high-performance, accessible, and scalable** applications using **React, TypeScript, JavaScript Python** and **Node.js**. Skilled in **API development, data visualization, and debugging**. Proven experience with **Google Cloud Platform, testing frameworks**, and cross-functional team collaboration to deliver impactful software solutions.

WORK EXPERIENCE

SOFTWARE ENGINEER | Acies, LLP - Goa, India

January 2026 – Present

- Built a full-stack **Row-Level Security (RLS)** system (**React, FastAPI, PostgreSQL**) with an admin UI for user, group, and exception-based access control, achieving compliance alignment for **banking-sector clients**.
- Architected a dynamic **white-labelling theming system** across Revolutio's microfrontend architecture spanning BI and Datahub modules serving fintech, banking, and HR clients, reducing enterprise **onboarding time by ~60%**.
- Leading development of a **Media Manager** module backed by **Azure Blob Storage** with chunked uploads, permission scoped sharing, and role-based access projected to support **10,000+ assets** per tenant across **3+ enterprise deployments**.
- Drove full-stack performance optimization across **React and FastAPI**, reducing API response time by **~30%** and frontend bundle size by **~25%** through **query optimization, lazy loading, and profiling**.
- Built **interactive data visualizations** for the Revolutio BI module using **React and Apache Echarts**, enabling tenant users to explore and analyze multi-source datasets aggregated via Datahub.
- Translated **Figma designs into pixel perfect**, responsive React components with high fidelity to UX specifications, ensuring visual consistency across the platform's multi-tenant interface.
- Leading and mentoring a **team of 4 engineers** across active feature streams, maintaining consistent sprint delivery and enforcing code quality standards through structured reviews.

SOFTWARE DEVELOPER | Aggio, LLC - St. Louis, MO

August 2020 – January 2025

- Developed and maintained **frontend and full-stack applications** using **React, TypeScript, Redux, Node.js**, and **Express** ensuring performance, scalability, and responsive UI.
- Designed and optimized **RESTful and GraphQL APIs**, reducing latency by 35%, and improving **data flow** and **API reliability** at scale.
- Led **performance profiling and optimization efforts**, reducing page load time by 30% via lazy loading, bundling, and request throttling.
- Built robust **end-to-end tests** using **Cypress** and **React Testing Library**, increasing test coverage and reducing production bugs by 15%.
- Enhanced **WCAG-compliant accessibility** and responsive layouts across all major devices, improving usability for diverse user groups.
- Automated reporting pipelines with **Python** and **Apache Airflow**, streamlining internal operations and reducing manual load.
- Deployed full-stack systems on **Google Cloud Platform (App Engine, Compute Engine, Cloud Storage)**, enabling scalable cloud infrastructure.
- Actively participated in **code reviews, design reviews, and debugging sessions**, contributing to **code quality, system health, and cross-functional collaboration**.
- Strengthened **data security and authentication flows** using **JWT**, ensuring secure access to sensitive application layers.
- Designed and optimized SQL queries for **PostgreSQL**, enhancing **database performance** and load handling under real-time conditions.

SOFTWARE SPECIALIST | eClinicalWorks Pvt. Ltd. - Westborough, MA

June 2017 - July 2018

- Developed frontend features using **React, JavaScript**, an improved the **UI/UX** of healthcare platform.
- Optimized **API performance** and backend logic for patient data systems, enhancing data integrity and speed.
- Diagnosed and resolved system issues via **Node.js debugging**, ensuring software robustness.
- Applied **unit and integration** testing using **Mocha and Chai**, increasing software robustness.
- Participated in frequent **code reviews** to maintain **development standards** and enhance team collaboration.

PROJECTS

Ask Overflow: Developed a Q&A web app using React, Node.js, Express.js, MongoDB, and Redis, allowing users to post and answer technical questions. Collaborated with a team to create a responsive UI and optimized backend performance with Redis caching.

AI Powered Job Tracker: Developed a Model Context Protocol (MCP) server for AI-powered job application tracking with Python, PostgreSQL, and natural language processing. Built full-stack system enabling conversational job search management through Claude AI integration and database-driven resume versioning.

SaveIT (Intelligent Savings Tracker): Built a savings tracker with a clean UI using React, Node.js and dynamic display features to help users manage their savings and expenses effectively.

SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java

Frontend Development: React, Redux, Material-UI (MUI), HTML, CSS/SASS, Bootstrap, D3.js, Chart.js

Backend Development: Node.js, Express.js, REST APIs, FastAPI, GraphQL

Database Systems: PostgreSQL, MySQL, Redis, MongoDB

Version Control & Cloud: GitHub, Bitbucket, Google Cloud Platform (GCP)

Testing: Cypress, Chai, Mocha

EDUCATION

Master of Science, Computer Science | Stevens Institute of Technology, Hoboken NJ | May 2020 | GPA: 3.93 / 4.00

Bachelor of Science, Computer Science | University of Mumbai, Mumbai India | May 2017 | GPA: 3.20 / 4.00
